Found a basic Fact Sheet prepared by Dow for this proprietary chemical. The good news seems to be that it is not very soluble in water, nor is it volatile. I will start searching for tox info. I'll touch base when I find something. Thanks.

Dawn,

Here's the message I called you about.

Thanks, Bonnie

Eric:

Do we have someone who can look into this chemical?

Thanks,

Fran

This looks like another proprietary chemical with limited public information available. Is EPA able to obtain any additional tox studies information from Freedom or elsewhere? Lora

Good morning,

During the 10am meeting with Freedom Industries this morning we were told that there was a mixture in Tank 396, instead of just MCHM. The mixture was approximately 5.6% of the PPH which can be found in the attached MSDS sheet from published by Freedom Industries. The PPH is a combination of the two products from DOW which are also attached to this email. Approximately 300 gallons of the PPH with 6251 gallons of MCHM for the total release (including what is still in the soil and what made it to the river).

Thanks,

Melissa Linden

Subject: MSDS for PPH

Hello,

Attached, please find the three MSDS for the PPH.

Thanks,
